Vox Pupuli

Why is Vox Pupuli?

- Maintaining a module on your own is hard

- Proper testing of a module requires a lot of stuff from the ruby ecosystem
 - Ruby ecosystem and related tools are changing too fast for a single person

modulesync

- We are managing more than 70 modules
- modulesync was developed by Puppet Inc, moved to Vox Pupuli
- It takes a config file + templates, throws it into every modules git repo
- Everybody can start it
